

Point Trading Services

Electro-Optical Lab and Maintenance Capability Overview

Point Trading Services offers a complete range of electro-optical night vision assembly, service and maintenance in our dedicated facility in Melbourne Victoria.

Point Trading has established itself via a number of defence and homeland security contracts as a leading supplier of night vision products including provision of ILS (integrated logistical support) to ensure your readiness.

Our Facilities Include		
Clean room	Electro-optical assembly tools and testing equipment for night vision	Calibration and purging equipment

We provide the full range of testing and maintenance services for our night vision devices, as well as provision of repairs during and after the warranty period. Point Trading stocks spare parts and components for our night vision products including in country stock of II Tubes. This ensures our ability to turn around equipment with minimum down time to the users.

Point Trading ILS management program includes purpose built software that will inform users of scheduled maintenance requirements as per manufacturer's specifications.

Point Trading is ISO 9001:2008 Quality Management and AS/NZS ISO 31000:2009 Risk Management qualified, to ensure our ability to provide your servicing needs.

Point Trading has recently completed an implementation of an Engineering Management System, compliant to EIA-632 Standard.

For further information about our servicing capability or to conduct a facility tour please contact:
