Paul Boyé Technologies, leader in design and manufacture of high technology personal protective equipment (PPE) is supplying the French Government (French Ministry of Health).

The filtering masks F.F.P.2 protect the wearers from particle inhalation hazards.

THE CAPABILITIES OF A MANUFACTURER

Important production capabilities

Thanks to its experience in the complex assembly of soft materials, Paul Boyé Technologies has developed an industrial automated process to ensure mass production of F.F.P.2 masks EN 149 : 2001 compliant.

Paul Boyé Technologies is ready to build a mask production plant worldwide, where it is needed.

Production capacity for one standard production unit: 5 to 10 millions masks per month.

A safe logistic

Established on a former military base in France, Paul Boyé Technologies has secure warehouse facilities and a high-capacity loading platform.

QUALITY REQUIREMENTS

Paul Boyé Technologies is ISO 9001 certified.

This certification ensures that a real Quality Assurance Organisation is established within all the company's departments to reply to the customers' needs and quality requirements.

Paul Boyé Technologies has also been certified by numerous national and international certifying organisations in the field of personal protective equipment.

Conform to the quality system standard AQAP-2110 and ISO 9001:2000
