

OMER 1 Rappelling Kit

The OMER1, an original Israeli invention (Pat No. 71719), is a Professional Descender with quick release mechanism that was developed for use by SWAT teams, Counter Terror and Special Forces around the world. Its uses include: Rappelling, Rescue and Military applications The Following features and advantages of OMER1 make it a unique apparatus in its field:

1. Rappelling is done with one hand only
2. Suitable for rappelling with left or right hand
3. Enable controlling the sliding speed
4. Suitable for both types of rappelling: Controlled or Hop-Rappelling
5. Maximum safety – stops automatically if handle is released or pressed upon too hard
6. No need for double-length rope. The ropes length is similar to the rappelling height.
7. Requires no special knowhow or auxiliary equipment (Gloves etc.)

Specifications:

- ▶ Weight: 850 gr.
- ▶ Material: Aluminum 6061-T6
- ▶ Sizes: 10.4 x 2.5 x 27 cm
- ▶ Finish: Black anodize
- ▶ Approved for use with up to 1,000 kg load
- ▶ Composed of 3 main parts: base, cover and activation handle
- ▶ 3 rubbing-pins at the base allow controlling the sliding speed

Affixing Apparatus:

- ▶ Foldable 90° affixing apparatus for flat roofs / where there is no anchoring for ropes
- ▶ Fast Tactical deployment
- ▶ L-Shaped locking device
- ▶ Anti-Skid Rubber sole
- ▶ Comes with a counter-beam for off-the-window sliding

OMER 1 Rappelling Device in Action
